

Medical Pass Blockchain - HOW it WORKS

MP Obtaining Medical Pass

With Electronic ID

Simply register on site and receive your digital blockchain wallet ID and password

With paper ID

Register in one of the Medical Pass Issuers and receive your digital blockchain wallet ID and password

With paper ID and no device

Register in one of the Medical Pass Issuers and receive a QR code that is used for creating connection to your digital blockchain wallet ID and password

Registering with Medical Pass at Institution

STEP 1 - Connection

Show your Medical Pass QR code at the Institution in order to establish the connection. If you already have a connection, the system will just confirm you have one.

STEP 2 - Verification

Institution verifies your paper or electronic ID and downloads your data automatically

STEP 3 - Issues Certificate

Once the test or vaccination is finished, Institution sends the **Credential** to your wallet

Using the Medical Pass Certificate

STEP 1 - Connection

Show your Medical Pass QR code to the Verifier in order to establish the connection or verify that the connection already exists.

STEP 2 - Verification

Verifier through the connection checks the required **Credential** depending on the role of the verifier and confirms whether you comply with the requirements

STEP 3 - Issues Certificate

Verifier send you the required confirmation that your **Credentials** meet all the requirements (for example to IATA Travel Check)
